# LegalCloud™

GET SPEED, CONTROL AND SCALE WITH A PRIVATE CLOUD

## WHAT YOU GAIN

### KEY FEATURES

- Infrastructure-as-a-Service
- Virtual desktops, dedicated servers
- SQL database and server management
- Authentication controls
- Server and VDI updates
- Tier IV data center
- Provider-owned/controlled servers
- 24x7 security monitoring
- Data encryption, anti-virus
- Microsoft Exchange Online and Office
- Application data storage
- Data backup
- Flat fees

### BENEFITS

- Lower IT costs
- Scale servers, users up or down
- Simple to add more applications
- Certainty on data location
- Fast compute speeds
- Mobile lawyer productivity
- Consistent user experience
- Data protection, security
- Data access during disasters
- Predictable cost

Mid-sized law firms are drowning in IT infrastructure demands, mobile lawyer frustrations and security concerns.

### WHAT IF YOU COULD ...

- Reduce IT costs and take advantage of new technology?
- Work from a client office, court or your cabin?
- Leverage expertise/resources to protect client data?
- Easily scale to add users and more applications?

### BUILD A PROFITABLE PRACTICE

You know your legacy technology is a productivity killer. But you don't have space or resources to manage an expanded IT footprint. LegalCloud helps you grow profits with lawyer productivity improvements and lower IT resource, infrastructure, utility and maintenance costs.

### WORK WHERE YOU WANT

Busy, mobile lawyers never stop working. The last thing you need is old technology and shared IT resources slowing you down. When working at a client, court or home office cocoon, LegalCloud gives you speedy, secure access to firm email, documents and practice management applications.

### PROTECT CLIENT DATA

As a lawyer, your practice depends on meeting Bar association, client and regulatory confidentiality requirements. Perceived as soft targets, cybercriminals increasingly target sensitive law firm data. Get peace of mind with LegalCloud enterprise-level security.

Many Infrastructure-as-a-Service Cloud Providers Lack Talent Resources to Support Custom Portfolios. – IAAS 2017 Predictions, Oracle

## LegalCloud™ Communicate

LegalCloud Communicate is a highly secure Infrastructure-as-a-Service solution, designed specifically for mid-sized law firms. Our legal IT experts customize, maintain and monitor the infrastructure your firm needs to succeed. You get speed and control, with virtual desktop technology, information access from anywhere and enterprise-level security.

## LegalCloud™ Law Office

LegalCloud Law Office supports firms ready to leverage more technology for operational efficiency. Along with everything in LegalCloud™ Communicate, you get additional infrastructure and maintenance services to run SQL-based practice management and other applications. With sophisticated legal technology, you can easily access and update client and matter information, or quickly approve a client bill from anywhere, any time. Our experts can help you scale, customize and integrate more systems into your LegalCloud Law Office as needed.

### TRUSTED LEGAL TECHNOLOGY EXPERTS

- 20 YEARS LEGAL SPECIALIZATION
- 500+ MIDSIZED LAW FIRM CLIENTS
- LEGAL APPLICATION CERTIFICATIONS
- INTEGRATION AND CUSTOMIZATION EXPERTS

### SUCCESS STORY

“LegalCloud opened up a new and more efficient way for our firm to operate, especially for mobile lawyers. They used to complain about remote access hassles. Now with LegalCloud virtual desktops, all our lawyers experience faster computing – in the office, away from the office and across our locations. What’s more, we feel Advanced Legal takes better care of data security, server performance and updates than we ever did. We just didn’t have the right resources.”

– 55-lawyer West Coast Law Firm
